

# A201 - Reducing Greenhouse Gas Emissions - Amendment

Moved by: Jordan Haynie Ware  
Seconded by: Travis Enright

Be it resolved that this General Synod amend the motion to read as follows:

Encourage dioceses and the members of the Anglican Church of Canada to reduce the emissions of greenhouse gases (GHG) from their **diocesan owned** buildings to zero as quickly as possible, and as safely and realistically as possible, **acknowledging the challenges present in remote communities, especially the North, and encouraging dioceses with historic wealth obtained via fossil fuels investment to share that wealth to support this transition.** ~~and by 2035 at the latest.~~

A decorative graphic consisting of numerous overlapping triangles in various colors (blue, green, yellow, orange, red, purple) arranged in a fan-like shape, pointing towards the right side of the slide.
